

Home Assignment. CSS Selectors

You need to submit this task for review.

Watch the video lessons to complete this task. If you have any questions, you may ask your mentor’s help via the use the real time chat on the learning platform. You can find it on the down right corner of your screen.

After you submit the completed task, mentors will review it and send their feedback via email. Don’t worry if your work is not approved: you can always retake the assignment, and it won’t affect your final grade.

Goal

Use CSS selectors to style several paragraphs in an HTML file.

Instructions

To accomplish this goal, follow the steps:

- 1 Download the “index.html” file and open it via Visual Studio Code.
- 2 Create a separate CSS file named “style.css.”
- 3 Link your new CSS file to the HTML file.

Hint

To do that, use the <link> tag.

- 4 Inside the “index.html” file, you will see the instructions. There are paragraphs that need to be styled accordingly:
 - one <h1> should be styled red using the “class” selector
 - another <h1> should be styled blue using the “ID” selector
 - <h2> should be styled gray using the “type” selector
 - <p> should be styled purple using the “root” selector
- 5 Save your work, and convert it to a “.zip” file.

Expected Output

After completing the assignment, you should see the following result:

Use the Class selector to make this Red

Use the ID selector to make this blue

Use the Type selector to make this Gray

Make the paragraphs purple using the root selector.

Lorem ipsum dolor sit amet consectetur adipisicing elit. Deserunt, suscipit quae similique explicabo obcaecati id aliquid consectetur excepturi nisi tenetur mag

How to upload completed tasks

To upload the assignment, make a “.zip” archive containing all the necessary files, and upload the file here.
