

Home Assignment. CSS Properties

Mentor-Review Module 2 Unit 1 Lesson 2

You need to submit this task for review.

Watch the video lessons to complete this task. If you have any questions, you may ask your mentor’s help via the use the real time chat on the learning platform. You can find it on the down right corner of your screen.

After you submit the completed task, mentors will review it and send their feedback via email. Don’t worry if your work is not approved: you can always retake the assignment, and it won’t affect your final grade.

Goal

Use CSS properties to style several paragraphs in an HTML file.

Instructions

To accomplish this goal, follow the steps:

- 1 Download the “index.html” file and open it via Visual Studio Code.
- 2 Create a separate CSS file named “style.css.”
- 3 Link your new CSS file to the HTML file.

Hint

To do that, use the <link> tag.

- 4 Inside the “index.html” file, you will see the instructions. There are paragraphs that need to be styled accordingly:
 - <h1> should be red and aligned to center, the font should be changed to Times New Roman
 - <h2> should be blue and aligned to the right, the font should be changed to Arial
 - <p> should be orange, the font should be changed to Impact

Optional task

Play with design to see the CSS magic. Try adding more paragraphs and changing their colors, fonts, and alignment according to your own preferences.

- 5 Save your work, and convert it to a “.zip” file.

Expected Output

After completing the assignment, you should see the following result:

Make the text red align this to center and change the font to Times New Roman

Make the text blue, align this to the right and change the font to Arial

Make the text orange, change the font to Impact

How to upload completed tasks

To upload the assignment, make a “.zip” archive containing all the necessary files, and upload the file here.
